

Software Development Engineer with 3+ years of exp building scalable, high-performance backend systems. Proficient in **Java, Spring Boot, Python**, and experience with **Azure and AWS cloud platforms**. Skilled in designing **microservices**, **developing RESTful APIs** and leveraged **OpenAI and Google GenAI SDKs** to architect intelligent chatbot.

SKILLS

Language & Framework	Java, Python, Spring Boot, Dropwizard, Microservices, Rest APIs, Spring MVC
Concepts & Testing	OOPs, Stream API, JUnit, Mockito
Database & Cloud	SQL, Azure, AWS (certificate)
AI Tools	OpenAI API, Google Gemini SDK, MCP
Tools & Methodologies	Git, Linux, Agile, Kanban, Scrum

PROFESSIONAL EXPERIENCE

Product Solution Engineer PhonePe

08/2025 — Present
Bengaluru, Karnataka

- Created automated **Python** scripts to link disparate APIs, resulting in a 50% faster end-to-end data pipeline for organizational tasks.
- Acted as the primary technical **POC** during user escalations, resolving cross team issues, API signature mismatches, and payload validation failures.
- Built modular **REST APIs** using **Spring Boot, Spring MVC, Spring DI**, and documented them with **OpenAPI (Swagger)**, cut developer onboarding time by 50%.
- Root-caused** complex production failures across asynchronous insurance workflows by correlating distributed **IDs**, **debugging log streams**, and resolving race conditions across microservice.
- Led end-to-end technical implementation and onboarding for enterprise clients across the full delivery lifecycle: **Customer Discovery** → **Workflow Configuration** → **API/Platform Integration** → **UAT** → **Go-Live**
- Owned end-to-end integration and custom workflow configuration on enterprise **no-code/low-code integration platforms**, **automating complex business logic**

Associate Software Engineer SymphonyAI

09/2023 — 05/2025
Bengaluru, Karnataka

- Built a **Java Spring Boot** microservice using **Spring DI, Spring MVC, and Spring Data JPA with PostgreSQL**, exposing **REST APIs** and reducing manual effort by 85%.
- Migrated a legacy feature to a **Spring Boot** microservice using **Spring DI and Spring MVC**, integrated a **feature flag**, and achieved 100% functional parity.
- Developed a **Spring Boot** feature using **Apache POI** and **file-handling REST APIs** to replace ETL scripts, improving performance and maintainability by 70%.
- Enhanced a shared **Java utility module** with **Apache POI and OpenCSV** to handle dynamic Excel/CSV headers, reducing duplicate logic by 80%.
- Wrote and optimized complex **SQL queries, joins, subqueries**, and views against large-scale **PostgreSQL databases** for deep production data validation, and transactional reporting.

Co-op Engineer Advanced Micro Devices(AMD)

12/2022 — 07/2023
Hyderabad, Telangana

- Contributed to AMD's AI Engine Verification team, developing and **automating post-silicon** validation frameworks using **Python (Pytest)** and extending test coverage with a **Java-based testing utility**, improving reliability and cross-platform compatibility.
- Built **Java tools** to parse and validate hardware test logs, automate report generation, and support AI engine validation workflows reduced manual debugging time by 40% and improved verification efficiency.

PROJECTS

E-Comm Inventory Link

Technologies -Java, SpringBoot, Microservice, Rest APIs, Spring MVC, OOPs, JUnit

- Developed a Spring Boot REST API for an in-memory inventory system with item management, search, sorting, and summary features using a clean service-layer architecture

FIFA AI Chatbot [Link](#)

Technologies - Python, GeminiAPI, Vector

- Built an AI-powered chatbot using Python and LLM APIs to answer FIFA-related queries with context-aware responses on players, teams, tournaments, rankings, and football rules.

EDUCATION

Bachelor of Technology in CSE

8.2 CGPA

2019 – 2023

- Rajiv Gandhi Proudlyogiki Vishwavidyalaya
